## Professional Summary

I am an innovative educator with 25 years of one-to-one coaching, consulting, classroom and leadership experience in executive functioning, social-emotional wellness, student support, curriculum & instruction support, teacher coaching, academic leadership and technology integration. Through my active engagement with individuals, families, classrooms and school communities I foster a dynamic learning experience rooted in tailored, evidence-based interventions to support individual student growth while promoting rigorous examination of ideas and compassionate, challenging dialogue. I hold a Masters Degree in Education specializing in Instructional Leadership and Curriculum Development that emphasizes non-hierarchical “leadership from the side.” I view every student as an individual with unique strengths and areas for growth, and I apply the experiences I have gathered across multiple decades assessing and supporting student learning to team proactively with students, families, colleagues and schools.
